IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area samples; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Forest Practices Variation Inspection. Coho jaws, opercula, etc. along banks up to Klawock-Hollis Hwy. Highway culvert may be perched at lower water levels. Did not survey above highway. Klawock-Heenya Corp. contractors report numerous CO fry in beaver pond at mouth of stream; 10'-15' OHW, 3%-5% gradient, gravel to small cobble substrate

ACTION: add stream, with designation CO_{sr}.
