OBSERVATION INFORMATION

| Species            | Date(s) Observed | Spawning | Rearing  | Migration | Anadromous |
|--------------------|------------------|----------|----------|-----------|------------|
| <u>coho salmon</u> | <u>4/29/94</u>   |          | <u>1</u> |           | <u>yes</u> |
|                    |                  |          |          |           |            |
|                    |                  |          |          |           |            |

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area samples; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Placed 2 baited minnow traps overnight. Stream originally cataloged as upper end of 103-60-10505, but separated a few years ago. Decent CO rearing habitat up to Craig-Klawock highway, probably too steep + squirrely above that. Trapped upper end anadromous.

Action: Add stream w/ CO from road to Crab Bay (probably a ♀).
