OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
coho salmon	7/11/97		21	yes	<input checked="" type="checkbox"/>
Dolly Varden	7/11/97		6	yes	<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Small stream on right bank of Mendenhall River, upstream of backloop road bridge. Stream is not shown on topographic maps. Set 1 trap upstream and 3 downstream of View Drive culverts. Good off-channel rearing habitat. Fish may migrate up to small pond that is shown on the maps.

DRAFT ON NEW MAPS AS NOTED.

Name of Observer (please print) Clayton Hawkes -- Area Habitat Biologist
 Date: 9/29/97 Signature:
 Address: ADF&G Habitat and Restoration Division
Box 240020 Douglas 99824

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Catalog of Waters Important for Spawning, Rearing or Migration of Anadromous Fishes per AS 16.05.870.
