REGION II HABITAT AND RESTORATION DIVISION

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
coho	9/22/98		<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: 1 coho fry caught at mouth, 1 more above barrier beaver dam using minnow trap, 24 hr soak. Also, stickle back and cutthroat at end of lake - no fish in inlet stream. Barrier dam 1-2 ft, stream below 2-3 ft wide, low gradient, empties to slough-brackish water. Nearby resident retired handtrailer Ted Haux has observed dozens of spawning chum & pink over last 15 yrs there.

Name of Observer (please print) Peter Branson f&w Tech III, Dianne Cassidy
 Date: 9/25/98 Signature: [Signature] volunteer
 Address: PO Box 2073
C Wrangell, AK 99929

This certifies that in my best professional judgement and belief the above information is evidence that this waterbody should be included in or deleted from the Catalog of Waters Important for Spawning, Rearing or Migration of Anadromous Fishes per AS 16.05.870.
