					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: The Middle Fork of Mink Creek was nominated last year. Trib 5 is actually a tributary from the North Fork of Mink Creek as you can see from the diagram. The other pertinent change is that trib 4's upper extent has reached up as far as Bet Creek which was also nominated last year. Due to a high water event the two are now connected. This stream also borders U-23 which has allready been cut. The new stream goes directly through a portion of U-23. No FPA was implemented since this tributary appeared after-the-fact.

Name of Observer (please print) Linda Speerstra-Perkins
 Date: 1/7/99 Signature: Linda Speerstra Perkins
 Address: 304 lake St. Rm. 103
Sitka, AK 99835

REGION II HABITAT AND RESTORATION DIVISION

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Catalog of Waters Important for Spawning, Rearing or Migration of Anadromous Fishes per AS 16.05.870.

Signature of Area Biologist: Phil Spooner
