 DIVISION**

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
coho	9/23/98		✓		

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: 2 coho fry, 1 cutthroat, 2 Dolly caught in pool below 1st barrier dam (beaver)
All sampling w/ minnow traps, salmon egg bait, 24 hr soak. 2 coho, 8 cuts, 6 dolly
caught in pond above 1st dam. 2 traps placed in inlet stream below & above
2nd dam yielded 6 dolly, 23 cuts, but no coho. Stream to first dam 2-3' wide, low gradient
sand/gravel, inlet stream rock, moderately steep 2-3' wide. Local resident Dr Craighead
Biologist, has observed 20-30 humpies & chum spawners in creek, 1995-98 (per conversation)
 9/98

Name of Observer (please print) Peter Branson F&W Tech III, Dianne Cassidy
 Date: 9/23 Signature: Peter Branson Volunteer
 Address: P.O. Box 2073
Wrangell, AK 99929

This certifies that in my best professional judgement and belief the above information is evidence that this waterbody should be included in or deleted from the Catalog of Waters Important for Spawning, Rearing or Migration of Anadromous Fishes per AS 16.05.870.
