Nomination #	<u>99 272</u>	<i>Janet Anderson</i>	<u>11-9-99</u>
Revision Year:		Regional Supervisor	Date
Revision to: Atlas	Catalog	<i>Edwin</i>	<u>12/15/99</u>
Both	<input checked="" type="checkbox"/>	AWC Project Biologist	Date
Revision Code: <u>A-2</u>			
		Drafted	Date

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Coho	6/6/99		37		<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: This tributary of the Yahtse River (10100) that has not been catalogued. During our field trip in June we verified coho presence up through the mid portion of section 19. A bridge was just being installed at this point. The stream gradient began to increase but the upstream extent of fish habitat wasn't located due to time limitations. A GPS way point was taken at the upper location: N.59 54.354, W.141 11.560.
