Nomination #	<u>99 273</u>	<u>Jonaflanders</u>	<u>11-9-99</u>
Revision Year:	<u>00</u>	Regional Supervisor	Date
Revision to: Atlas	Catalog	<u>EAJ</u>	<u>12/15/99</u>
	Both <u>X</u>	AWC Project Biologist	Date
Revision Code:	<u>A-2</u>		
		Drafted	Date

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Coho	6/6/99		16		<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: This is a tributary to the Yahtse (2) nomination which is a tributary of the Yahtse River (10100). During our field trip in June we verified coho presence along the northern boundary of section 30. The gradient at this location is relatively flat and seems to be the head waters of a swampy/marsh area. A GPS way point was taken at the upper location: N.59 53.887, W.141 12.425.

ALASKA DEPT. OF
