**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:** This nomination is a correction to the catalogued Yana River Trib 184-10-10100-0010. This system was followed down completely during our field trip in June. There is a gradient change at the SW corner of Section 17 that sends the system towards and into the Yahtse River 185-10-10100.
