Nomination for Waters
Important to Anadromous Fish

Region SOUTHEAST

USGS Quad Icy Bay D-1

Anadromous Water Catalog Number of Waterway 184-10-10100-2011-

Name of Waterway Yana River Trib USGS Name Local Name

Addition Deletion Correction Backup Information

For Office Use

Nomination #	<u>99 280</u>	<u>Jana Flanders</u>	<u>11-9-99</u>
Revision Year:	<u>2001</u>	Regional Supervisor	Date
Revision to: Atlas	Catalog	<u>[Signature]</u>	<u>2/28/02</u>
	Both <u>X</u>	AWC Project Biologist	Date
Revision Code:	<u>A-2</u>	<u>[Signature]</u>	<u>3/14/01</u>
		Drafted	Date

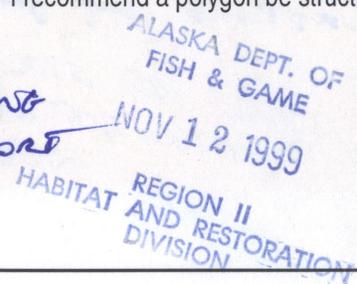

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Coho	6/3/99	6	19		<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: This nomination is an addition (Road 5102) to the catalogued Yana River Trib 184-10-10100-2011. A minnow trap was set for 45 minutes and juvenile coho were identified and released. Adult coho carcasses were also found along the streambed. This system is a myriad of lakes that are all interconnected at some point. I recommend a polygon be structured for this site due to the amount of water in the area and the lack of gradient.

ADD AS stream, need more supporting documentation, photos etc. to support polygon. Saw 2/28/02

Name of Observer (please print): Linda Speerstra
 Signature: [Signature] Date: 11/4/99
 Address: 304 Lake St. Rm. 103
Sitka, AK 99835

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Catalog of Waters Important for Spawning, Rearing or Migration of Anadromous Fishes per AS 16.05.870.

OBSERVATION INFORMATION

Color	Species	Date(s) Observed	Spawning

IMPORTANT: Provide all supporting documentation that this water body is important to fish and the proper observer, sampling methods, sampling duration and time of day, location of mouth and observed upstream extent of each species, as well as other information (water temperature, type, and width of any barriers, etc.)

Comments: This nomination is an addition (Form 8102) to the existing waterway. This system is a mixed of lakes that are all interconnected at this site due to the amount of water in the area and the lack of gradient. was set for 45 minutes and juvenile coho were identified and released.

WAITING ON PHOTOS
CALL FROM LINDA ON THESE IN TERMS OF LOCATIONS IN THE STREAM OR MOUTH

POLYGON
ADDITIONAL TAGGING/BACKUP
LOCATION OF SET CARCASSES
EXTENT OF POND.

ADD AS STATION NEVER GOT ADDITIONAL INFO OR PHOTOS

ADD AS STATION, NEED MORE DOCUMENTATION, PHOTOS, etc.
POLYGON. TAG SETS
