OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Coho salmon	April 24 - May 2, 1999		X		<input checked="" type="checkbox"/>
Dolly Varden	April 24 - May 2, 1999		X		<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

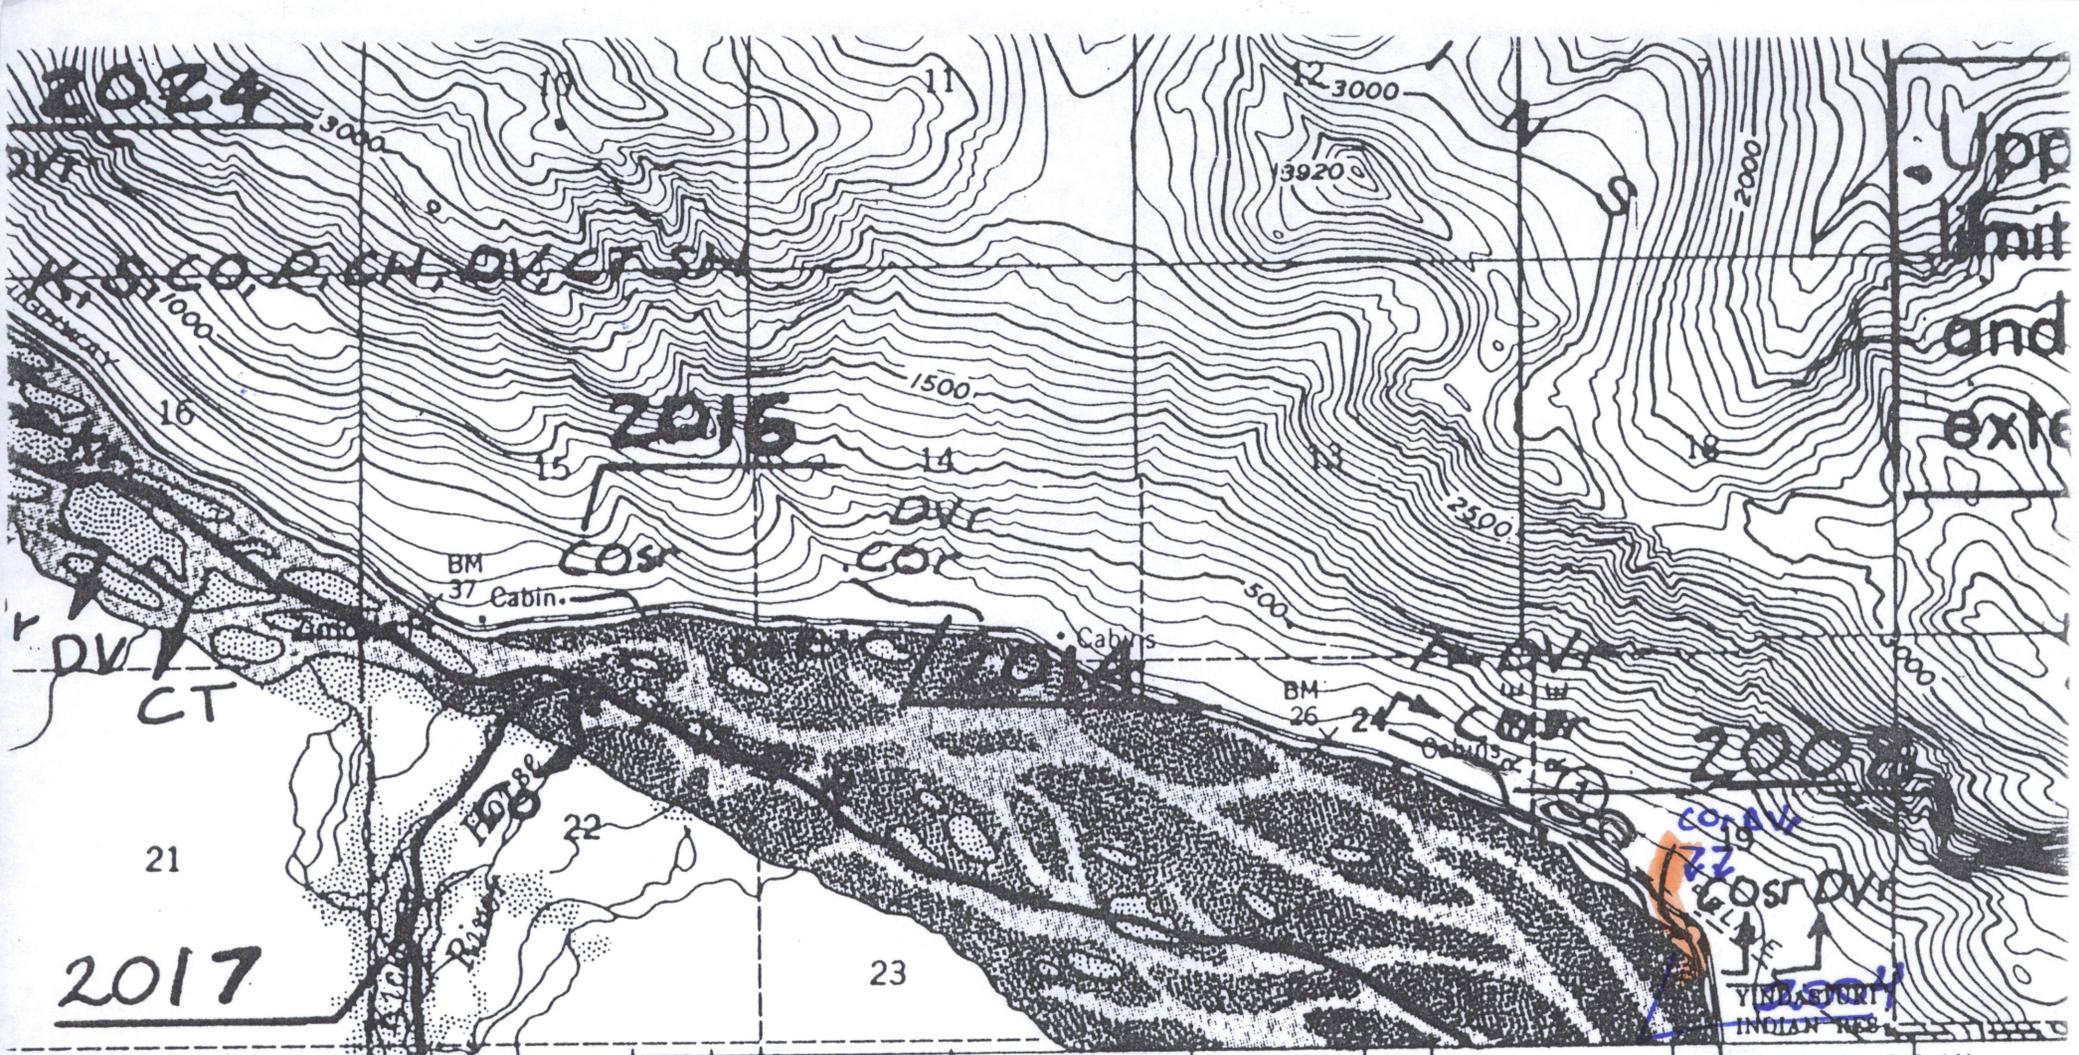

**Comments:** During the spring of 1999, Division of Sport Fish funded a coded wire tagging (cwt) project for coho and chinook salmon smolt in the Chilkat River drainage. As part of this project, we trapped tributaries of the Chilkat River from Yindastuki (Haines airport) to 8 mile of the Haines Highway. Between April 24 and May 2, 1999 we captured 254 coho fry and smolt (and uncounted Dolly Varden) out of this small stream for an average CPUE of 7.25 coho/trap/day. This stream was incorrectly identified on the atlas as part of Waterfall Creek 115-32-10252-2008. The stream previously identified as Waterfall Creek is actually three distinct tributaries (see attached map).

Name of Observer (please print) Randy Erickson - SF Area Management Biologist  
 Date: 9/1/99 Signature: \_\_\_\_\_  
 Address: ADF&G Division of Sport Fish  
Box 330 Haines 99827

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Catalog of Waters Important for Spawning, Rearing or Migration of Anadromous Fishes per AS 16.05.870.

Signature of Area Biologist: \_\_\_\_\_
