Key to Samp. ID

Samp. ID: A Method: Portable Electrofisher Electrofisher Time(s): 431 Efficiency: Poor
Comments: Could only sample from bank; channel too deep for wading.

Additional Comments: The nominated waterbody flows to the Nushagak River (325-30-10100), in which coho salmon are documented. Observations of collected coho salmon and of the aquatic habitat strongly suggests spawning within the nominated waterbody.
