Site Information Station: FSB0313A02 Date Observed: 8/18/2003 Legal Desc.: Sec 12, T. 3 N., R. 48 W., S.M. Latitude: Longitude: Datum:
Stream Depth (m) Width (m) Water Temp. (C): 5 (Transformed) 60.36566 -157.54827 NAD27
Parameters: OHW 0.5 7.5 Stream Stage: High
Wetted 0.5 7.5 Dominant Substrate: Cobble (Original) 60.36492 -157.55083 WGS84

Rosgen Channel Type: C3 Low gradient, meandering, point-bar, riffle/pool, alluvial channels with broad, well-defined floodplains.

Station Comments: Beaver activity in immediate area. Downstream of 13A01. Other streams in the Klutapuk Creek drainage appear to provide comparable habitat and should be surveyed. Two adult bald eagles observed on stream near the confluence of the two major Klutapuk Creek tributaries; could be feeding on adult chinook salmon.

Observation Information

Life History: Anadromous

Species\Lifestage: Chinook salmon juvenile	Samp. ID (# Fish): A (1)	Barriers: Specific Barrier Unknown
Species\Lifestage: coho salmon juvenile (suspected spawning)	Samp. ID (# Fish): A (99)	Barriers: Specific Barrier Unknown

Key to Samp. ID

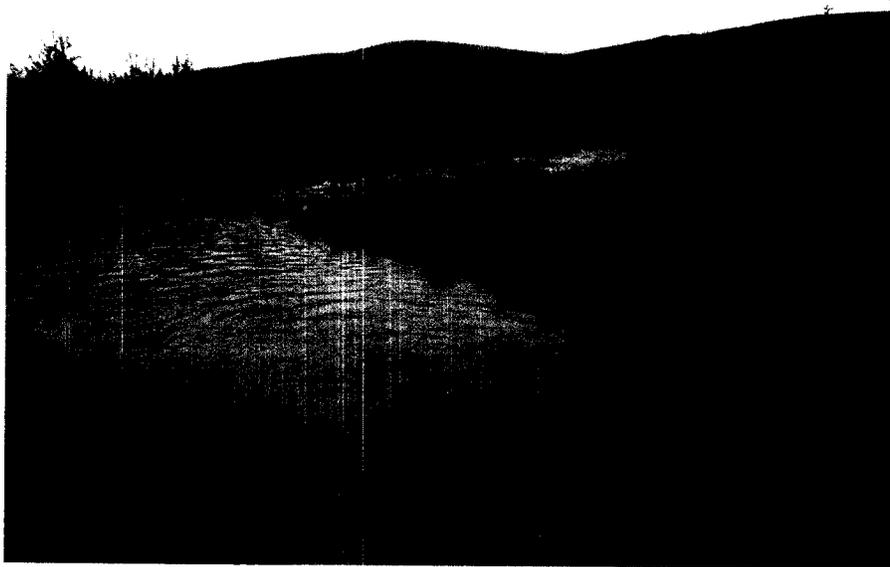

Samp. ID: A Method: Portable Electrofisher Electrofisher Time(s): 198 Efficiency: Fair
Comments: Sampled both main channel and off-channel habitats.

Additional Comments: This waterbody is in upper Klutapuk Creek (325-30-10100-2481), in which spawning Chinook salmon are documented. Klutapuk Creek flows to the Nushagak River (325-30-10100), in which Chinook and coho are documented. Coho spawning strongly suspected. *Extend stream w/ CAR*

Key to Samp. ID

Samp. ID: A Method: Portable Electrofisher Electrofisher Time(s): 353 Efficiency: Poor
Comments: Sampling was conducted in main channel, off channel, and in a side channel. The preponderance of fish (including chinook) were captured in the main channel.

Additional Comments: The nominated waterbody flows to the King Salmon River (325-30-10100-2435), in which spawning coho and Chinook salmon are currently documented. Observations of collected Chinook salmon and available aquatic habitat strongly suggests adjacent spawning.
