**Key to Samp. ID**

Samp. ID: A Method: Portable Electrofisher Electrofisher Time(s): 311 Efficiency: Fair

**Additional Comments:** The waterbody flows to Old Man Creek (325-30-10100-2202-3075), in which spawning coho salmon are currently documented. Observations of the aquatic habitat and the small size and abundance of collected juvenile coho salmon strongly suggests spawning here.
