OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
<u>Pink Salmon</u>	<u>8/12/61</u>			<u>1,200</u>	<input checked="" type="checkbox"/>
<u>Pink Salmon</u>	<u>8/09/62</u>			<u>3,000</u>	<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

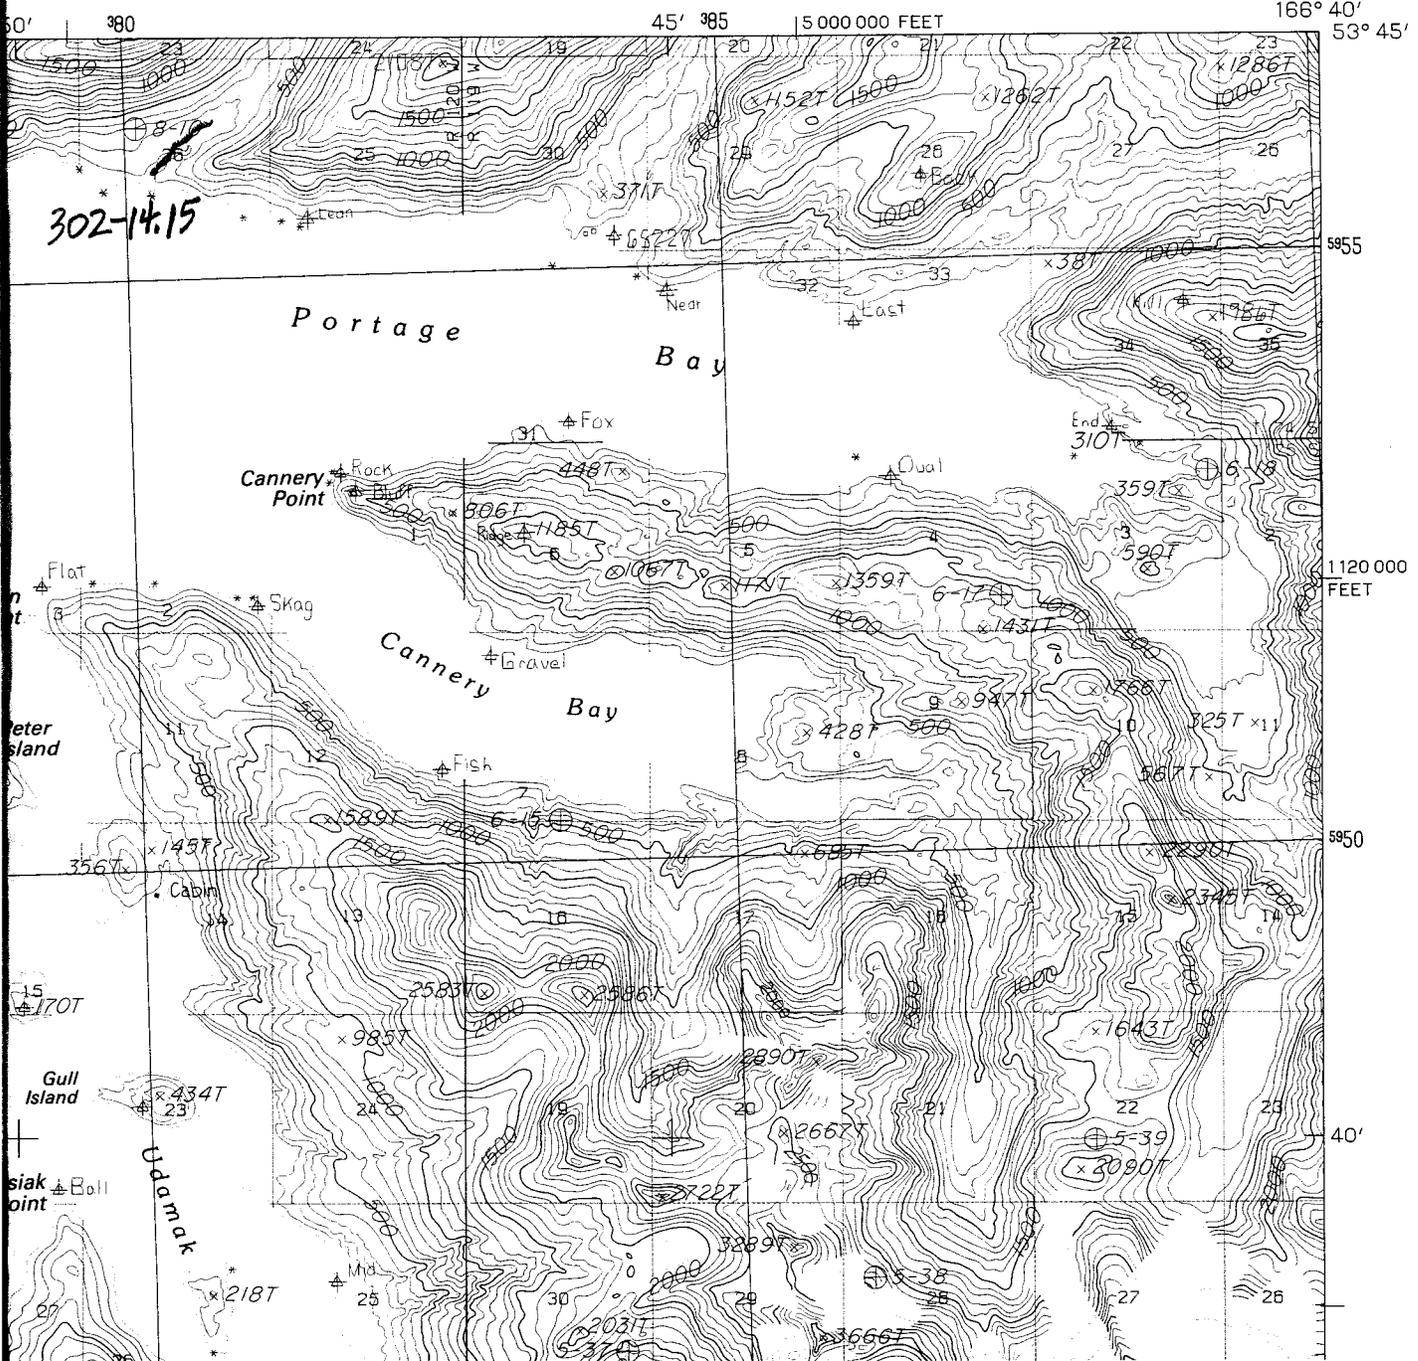

**Comments:** This stream is referred to as Portage Bay #1, number 302-14.15 in the Division of Commercial Fisheries Stream Survey log book.  
No fish observed since 1962. Last surveyed on 7/31/81.  
stream terminus is located at approximately 53°44' 22" N, lat, 166° 50' 58" W. long.

REMARKS: Anadromous fish stream  
nominations. All are in the oil spill  
area on Unalaska Island. Three are  
pretty minor, but one (Station Bay West  
Arm) is a nice looking stream and at  
times gets a lot of fish.
