MEMORANDUM

TO: J. Johnson
Habitat Biologist

FROM: Michael Wiedmer
Habitat Biologist
Region V

DATE: October 23, 2006

SUBJECT: 2006 Swan River nominations

Attached are Fish Distribution Database/Anadromous Waters Catalog (FDD/AWC) nominations for the Swan River (325-30-10100-2202-3080-4029). In 2006, our freshwater fish inventory (Wiedmer 2006) of the Nushagak/Mulchatna drainage yielded 4 contiguous fish sampling efforts on the lower Swan River. Observations from these individual sampling efforts did not support previous reports of Arctic char and spawning sockeye, Chinook, pink, chum, and coho salmon.

Collectively, these 4 observations support adding to the FDD/AWC whitefish (humpback) (observed at 2 of 4 sampled locations, Figure 1) from the Nushagak River, in which they are currently documented, upstream to Station FSN0604A02.
