IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:

These observations were reported to ADF&G by HDR, Alaska, Inc., as required for Fish Resource Permits SF2007-144 and SF2007-053. Kr is not listed in the 2007 Anadromous Waters Catalog for this stream, but this stream was previously nominated for Kr in 2007. This nomination also provides back-up information for Sr, and COr, which are already listed in the 2007 AWC for this stream. Fish were collected and/or observed using backpack electrofishers and minnow traps during June 2007 through October 2007. See the attached map and spreadsheet for site-specific location information and fish observations.
