IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. **Attach a copy of a map showing location of mouth and observed upper extent of each species,** as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

313-30.03 Sapsuk River, Peterson Creek. Aerial surveys have been conducted on this system since the **1960s** and observers have noted the presence of **chum and chinook salmon**, which has been published in our ADF&G Annual Salmon Management Reports (AMR). Add Dolly Varden present to 313-30-10140-2013-3006

In addition, I have been the area biologist who conducted aerial surveys in this region for the past 19 years and have personally witnessed dolly varden in this stream; please add.
