IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. **Attach a copy of a map showing location of mouth and observed upper extent of each species,** as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

313-30.01 David's River. Aerial surveys have been conducted on this system since the **1960s** and observers have noted the presence of **sockeye, coho, chum and chinook salmon**, which has been published in our ADF&G Annual Salmon Management Reports (AMR).

Please add chum (1960,1963,1964,1965,1966,1970,1976) salmon.

Supported by nom #s 09-147, 09-102, 09-145

Name of Observer (please print): on file; name and date is published in AMR

Signature: _____ Date: _____

Agency: Alaska Department of Fish & Game

Address: 211 Mission Road
Kodiak, Alaska 99615

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Anadromous Waters Catalog.

Signature of Area Biologist: Robert Murphy Date: 12/4/08 Revision 02/08

Name of Area Biologist (please print): Robert Murphy, FBIII
