IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes, etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers, etc.

Comments:

During joint Division of Forestry and Division of Habitat field review of a proposed timber sale we electro-fished an unnamed tributary to 251-82-10029. We captured and released four juvenile coho salmon 40-55 mm FL. Observed >60 Dolly Varden approximately 250 mm long. An 8-foot high barrier is located 0.7 miles above the tributary confluence with 251-82-10029 (Figure 1).
