OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
pink salmon	70,76,98,05	y	y	yes	<input checked="" type="checkbox"/>
coho salmon	05	y	y	yes	<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. **Attach a copy of a map showing location of mouth and observed upper extent of each species,** as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

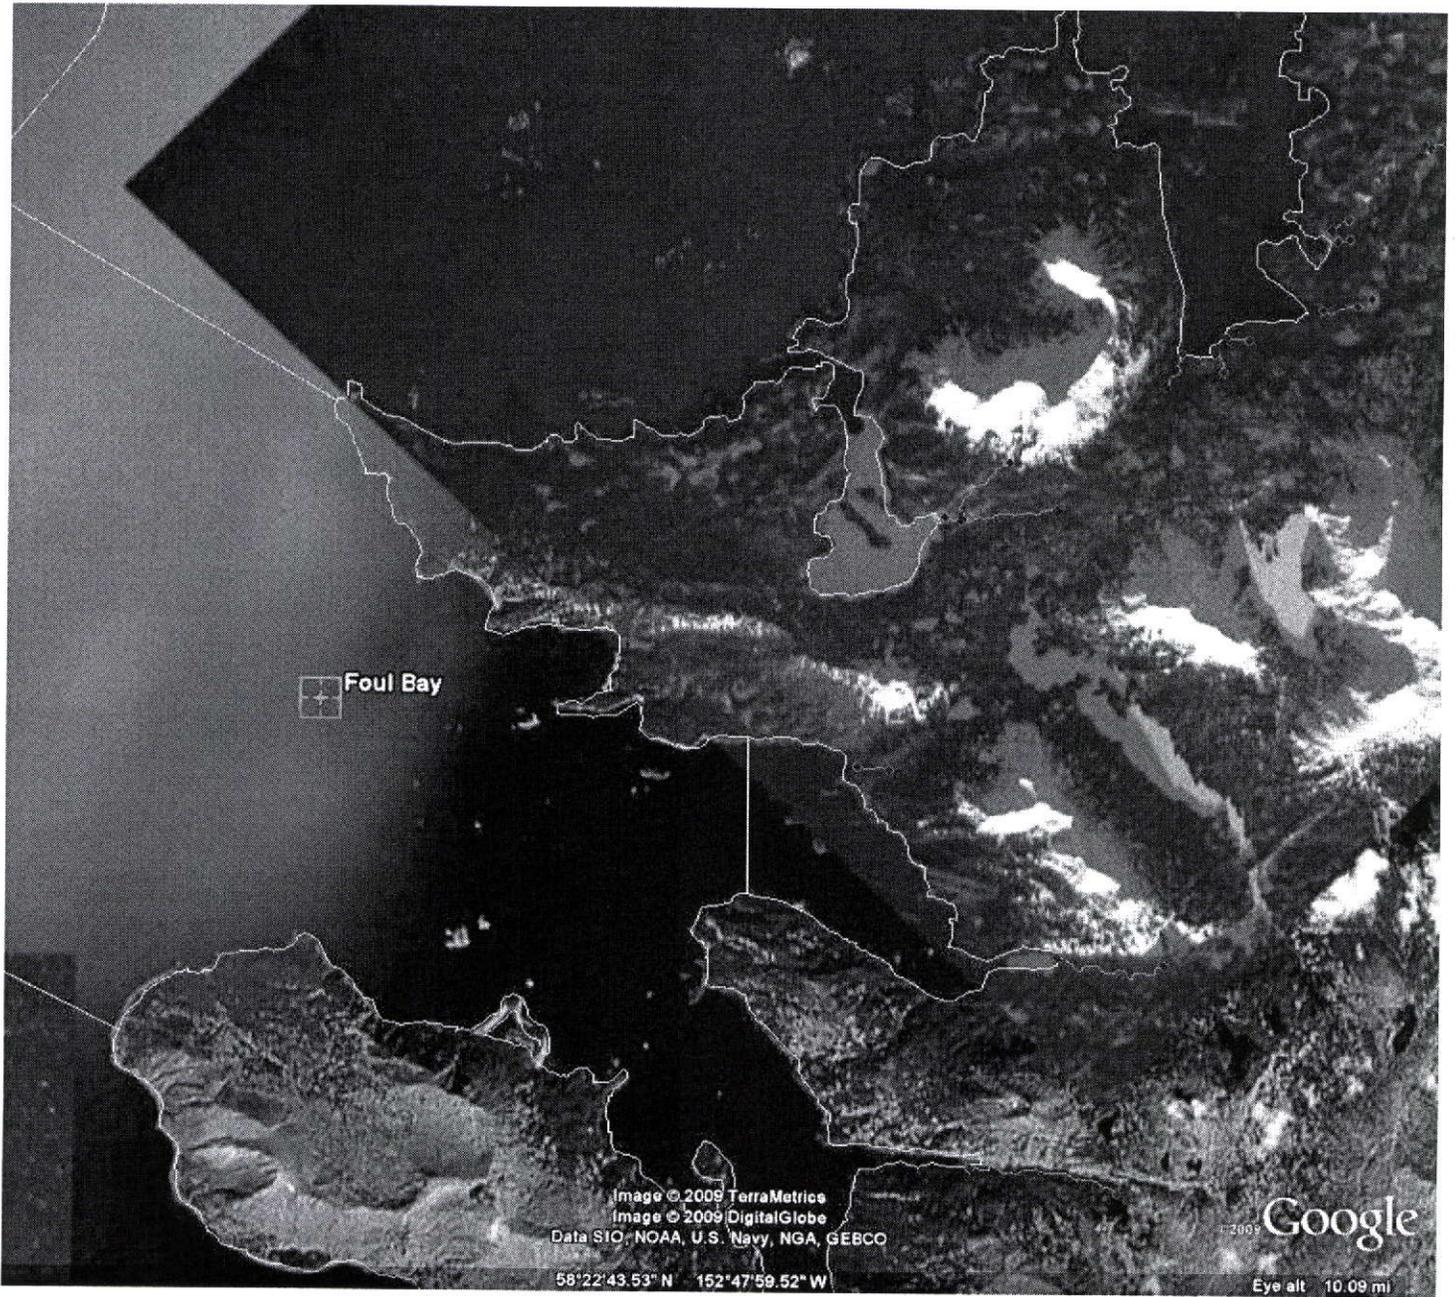

Aerial surveys have been conducted on this system since the 1970's and observers have noted the presence of **pink and coho salmon**, which has been published in our ADF&G Annual Salmon Management Reports (AMR). Data can be found in RBASE.

Add new stream 1/5th m 660ft 251-50-10006 w/ chum and pink salmon spawning/rearing

Name of Observer (please print): on file; name and date is published in AMR
 Signature: _____ Date: _____
 Agency: Alaska Department of Fish & Game
 Address: 211 Mission Road
Kodiak, Alaska 99615

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Anadromous Waters Catalog.

251-501 is the KMA number for it.

On that map you sent- it is the one located by the word DOME. The middle stream out of the 3. Hope you can understand that?

Let me know. Thanks.

For all the ones that say, "bay" yes- the species in there are just for the "bay". I nominated them because we had the data for your information- but since it's a repeat of what is in the creeks around it, I guess I wouldn't worry about it. I just didn't want to leave anything out.
