**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:**

During site investigation after the October 2009 flood (Foot Survey), I observed approximately 15 adult coho salmon directly above and below the Anton Larson Bay Road. Approximately 10 Adult Dolly Varden +/- 300 mm in length were also present above and below the road. The geomorphology at the road crossing is Rosgen B-3.

*Add coho salmon & Dolly Varden present to stream*
