IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Adriana Shaw is w/ coho salmon rearing
 I set a baited minnow trap at the new 48-inch diameter culvert located at the Anton Larson Bay Road MP 3.5 (ADF&G, Culvert Inventory, ALB05) outlet and a minnow trap 50 feet above the culvert inlet. The traps soaked about 0.5 hours. The trap below the culvert captured three young of the year coho and three Dolly Varden. The trap located above the culvert captured three young of the year coho and five Dolly Varden.
