					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Salonie Creek Road MP 0.0 (ADF&G, Culvert Inventory, CR 40B). The culvert is a 12-inch diameter wood stave culvert located at 57°41'40.761"N, 152°32'56.761"W in an unnamed tributary to Stream No. 259-22-10030. I set two baited minnow traps above the culvert. Trap one was set about 500 feet above the culvert and trap two was set about 700 feet above the culvert. Trap one captured two young-of-year coho salmon and one Dolly Varden. Trap two captured 10 coho salmon 40-75 mm FL. The average stream channel width is four feet and the slope is < 1%. Salonie Creek Road MP 0.4. I set one baited minnow trap at 57°41'24.646"N, 152°33'6.646"W. The trap captured 1 young-of-year coho salmon (Figures 1 and 2). The geomorphology of the unnamed stream is Rosgen E-5.

Add new stream w/ coho salmon rearing

Name of Observer (please print): Will Frost, Habitat Biologist
 Signature: [Signature] Date: 11/16/2010
 Agency: ADF&G, Division of Habitat
 Address: 333 Raspberry Road
Anchorage, AK 99518

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Anadromous Waters Catalog.
