IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:

During a Forest Practices inspection on November 8, 2010, I walked about 50 feet above the confluence of stream no. 252-33-10030 and located a barrier about 30 feet high. The barrier is about 1.0 linear mile above mean high water of Kazakof Bay at Lat 58.174315, Long 152.624569 (Figures 1 and 2).

Add barrier, shorten stream
