IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: One juvenile coho salmon was observed by R2 on 9/9/08 during snorkeling surveys at 59.88316 / -155.17041 (RKm 0.22). This nomination provides back-up information for COr, which is already listed for this stream. See Table 1, the attached map, and GIS shapefile for site-specific location information and fish observations.
