OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Sockeye Salmon	9/4/04	Y			<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:
 This nomination provides back-up information for Ss, which is already listed for this stream. Many spawning sockeye salmon were observed during electrofishing surveys conducted by HDR on 9/4/04 at 59.83503 / -153.76364. In addition, 1 Dolly Varden (83 mm) and 20 sculpin were captured in areas without sockeye. See Table 1, the attached map and GIS shapefile for site specific location information and fish observations.

Name of Observer (please print): HDR; Prepared by Betsy McGregor (R2)
 Signature: _____ Date: 1/24/11
 Agency: R2 Resource Consultants, Inc.
 Address: 2600 Cordova St, Ste 211
Anchorage, AK 99503

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Anadromous Waters Catalog.
