OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Coho Salmon	5/20/2011		X		<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:**

During a culvert removal inspection I used a baited minnow trap to sample an unnamed tributary to Strip Creek (Figures 1 and 2). The unnamed stream is an undocumented reach of Waterbody No. 258-80-10080. The stream is about 4 feet wide and less than 2% slope. I placed the trap about 20 feet above the new ford crossing No. 5, located on the USCG road. I captured 4 juvenile coho salmon and 10 Dolly Varden.

*add new stream w/ coho salmon REARING*

*REF 11-279*

Name of Observer (please print): Will Frost, Habitat Biologist  
 Signature: [Signature] Date: 6/1/2011  
 Agency: ADF&G, Division of Habitat  
 Address: 333 Raspberry Road  
Anchorage, AK 99518

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Anadromous Waters Catalog.
