OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Coho Salmon (2)	7/22/2011		X		<input checked="" type="checkbox"/>
Dolly Varden	7/22/2011			X	<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:

During a culvert survey I used an electroshocker to sample an unnamed stream adjacent to the Salonie Creek rifle range (Figures 1 and 2). I captured and released two juvenile coho salmon at Lat 57.675964, Long -152.57195, and 25 juvenile Dolly Varden. The unnamed creek is about 2 feet wide and less than 2% slope. A 4-foot high barrier to juvenile fish is located at Lat 57.675601, Long -152.572192.

Extend stream w/ coho salmon rearing, add barrier upstream from upper pt

Name of Observer (please print): Will Frost, Habitat Biologist
 Signature: [Signature] Date: 7/28/2011
 Agency: ADF&G, Division of Habitat
 Address: 333 Raspberry Road
Anchorage, AK 99518

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Anadromous Waters Catalog.
