OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Pink Salmon	9/11/2011	X			<input checked="" type="checkbox"/>
Chum Salmon	9/11/2011	X			<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:

During a foot survey, I observed about 25 adult pink salmon and 5 chum salmon in the unnamed stream adjacent to the north side of the Chiniak Highway (Figures 1 and 2).

*Reposition stream are retaining original lower pt, more upper pt
add pink and chum salmon spawning to stream*

Name of Observer (please print): Will Frost, Habitat Biologist
 Signature: [Signature] Date: 9/16/2011
 Agency: ADF&G, Division of Habitat
 Address: 333 Raspberry Road
Anchorage, AK 99518

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Anadromous Waters Catalog.

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Coho	11/13-15/2002	X			<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: During field inspections over the period November 13 - 15, 2002 spawning coho salmon were noted in this roadside stream. The stream originates from springs and upwelling ground water adjacent to the road and flows alongside the Chiniak Highway for a distance of about a half a mile before dumping into the Olds River below the highway bridge. Coho salmon were milling and spawning throughout this distance. See attached photos. Over 30 coho spawners and carcasses were noted. Add stream for coho spawning.
