OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Pink Salmon	9/10/2011	X		X	<input checked="" type="checkbox"/>
Juvenile Coho Salmon	9/10/2011		X		<input checked="" type="checkbox"/>
Dolly Varden	9/10/2011			X	<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:** During a joint Forest Practices inspection, we I drove to a spur road located about 400 feet above sea level and hiked into a valley to the 200 foot elevation. I used an electrofisher to sample for fish presence in an incised unnamed tributary to the Chiniak River. The stream flows from Neptune Lake. The average channel width is about 7 feet and the channel slope is 5% to 15%. The stream is adjacent to a future timber harvest unit. I observed about 100 spawning pink salmon in the lower reach of the stream. I sampled about 2,000 linear feet of the stream. I captured and released about 10 juvenile coho salmon and adult and juvenile Dolly Varden. I observed no pink salmon in the upper reach of the stream. In the upper reach, the channel slope was less than 30% and I located two bedrock controlled 4-foot high barriers.

Name of Observer (please print): Will Frost, Habitat Biologist  
 Signature: [Signature] Date: 9/16/2011  
 Agency: ADF&G, Division of Habitat  
 Address: 333 Raspberry Road  
Anchorage, AK 99518

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Anadromous Waters Catalog.
