Revision Year: <u>2013</u>	<u>Will Frost</u> Habitat Operations Manager	<u>9/4/12</u> Date
Revision to: Atlas _____ Catalog _____ Both <u>X</u>	<u>Will Frost</u> AWC Project Biologist	<u>6/8/12</u> Date
Revision Code: <u>A-1, B-6</u>	<u>Will Frost</u> Cartographer	<u>10/9/12</u> Date

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Coho Salmon	5/1/2012	<u>X</u>	<u>X</u>		<input checked="" type="checkbox"/>
Rainbow Trout	5/1/2012			X	<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:**

I set six baited minnow traps in the old Lower Reservoir above a rip rap drop channel and one trap below the drop channel in the specified waterbody (Figures 1 and 2). The traps above the drop channel captured 2 juvenile coho salmon and 1 juvenile rainbow trout. The trap below the drop channel captured 12 juvenile coho salmon. Based on the trapping results, the drop channel may be a partial barrier to fish passage.

Extnd stream w/ coho SA in rearing

Name of Observer (please print): Will Frost, Habitat Biologist  
 Signature: [Signature] Date: 5/16/2012  
 Agency: ADF&G, Division of Habitat  
 Address: 333 Raspberry Road  
Anchorage, AK 99518

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Anadromous Waters Catalog.
