IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Add new stream less than 660 ft w/ coho salmon rearing
 During a culvert survey with the KSWCD, I used an electrofisher to sample an unnamed tributary of Cliff Point Creek (Figures 1 and 2). I captured 5 y-o-y coho salmon and observed an additional 50 coho salmon.

Name of Observer (please print): Will Frost, Habitat Biologist
 Signature: [Signature] Date: 6/6/2012
 Agency: ADF&G, Division of Habitat
 Address: 333 Raspberry Road
Anchorage, AK 99518

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Anadromous Waters Catalog.
