OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Coho Salmon (30)	5/24/2012		X		<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments** Add coho salmon REARING to stream update hydrography  
 During joint ANC sampling, I observed juvenile coho salmon in the area of proposed timber harvest activities. I determined the fish are coho salmon by the pale orange caudal fin, the leading edges of the anal and dorsal fins had white followed by black and the anal fin is sickle-shaped. The water conditions were low and clear with excellent visibility. The fish were located in pool habitat (Figures 1 and 2).

Name of Observer (please print): Will Frost, Habitat Biologist  
 Signature: [Signature] Date: 6/4/2012  
 Agency: ADF&G, Division of Habitat  
 Address: 333 Raspberry Road  
Anchorage, AK 99518

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Anadromous Waters Catalog.
