IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments Add barrier to stream, upstream of upper point.
 During joint ANC fish sampling, I located a 5-foot high barrier at 58.20704, -152.5153. The barrier is above the current specified length of stream.
