OBSERVATION INFORMATION

| Species | Date(s) Observed | Spawning | Rearing | Present | Anadromous               |
|---------|------------------|----------|---------|---------|--------------------------|
|         |                  |          |         |         | <input type="checkbox"/> |
|         |                  |          |         |         | <input type="checkbox"/> |
|         |                  |          |         |         | <input type="checkbox"/> |
|         |                  |          |         |         | <input type="checkbox"/> |
|         |                  |          |         |         | <input type="checkbox"/> |

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:**  
During a fish habitat survey I used a hand held Garmin GPS to correct the outlet of Franks Creek (Figure 1).
