IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat, locations, types, and heights of any barriers; etc.

Comments:

I used a hand held Garmin GPS to locate the correct outlet to the stream and located the 5-foot high barrier (Figures 1 and 2). "Small Creek " is the name of the creek that is posted by the ADOT&PF and is locally known. Please correct the name to Small Creek.

add local name, revise hydrography, add barrier
