IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:

During a foot survey I observed pink salmon spawning in the creek above the culvert. (Figure1). The culvert is damaged and may be a partial barrier to fish passage(KOD05-CR-10).

Add new stream w/ pink salmon spawning
