					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Change upstream portion of 259-24-10051 to 259-24-10051
 During a foot survey I observed pink salmon spawning in the main creek. I ended the survey at the power line easment (Figures 1 and 2). The upper extent of the specified reach as currently depicted in the AWC is a tributary to Stream No. 259-24-10051.
2013

ret 13-069 Extend 259-24-10051 at pink salmon spawning

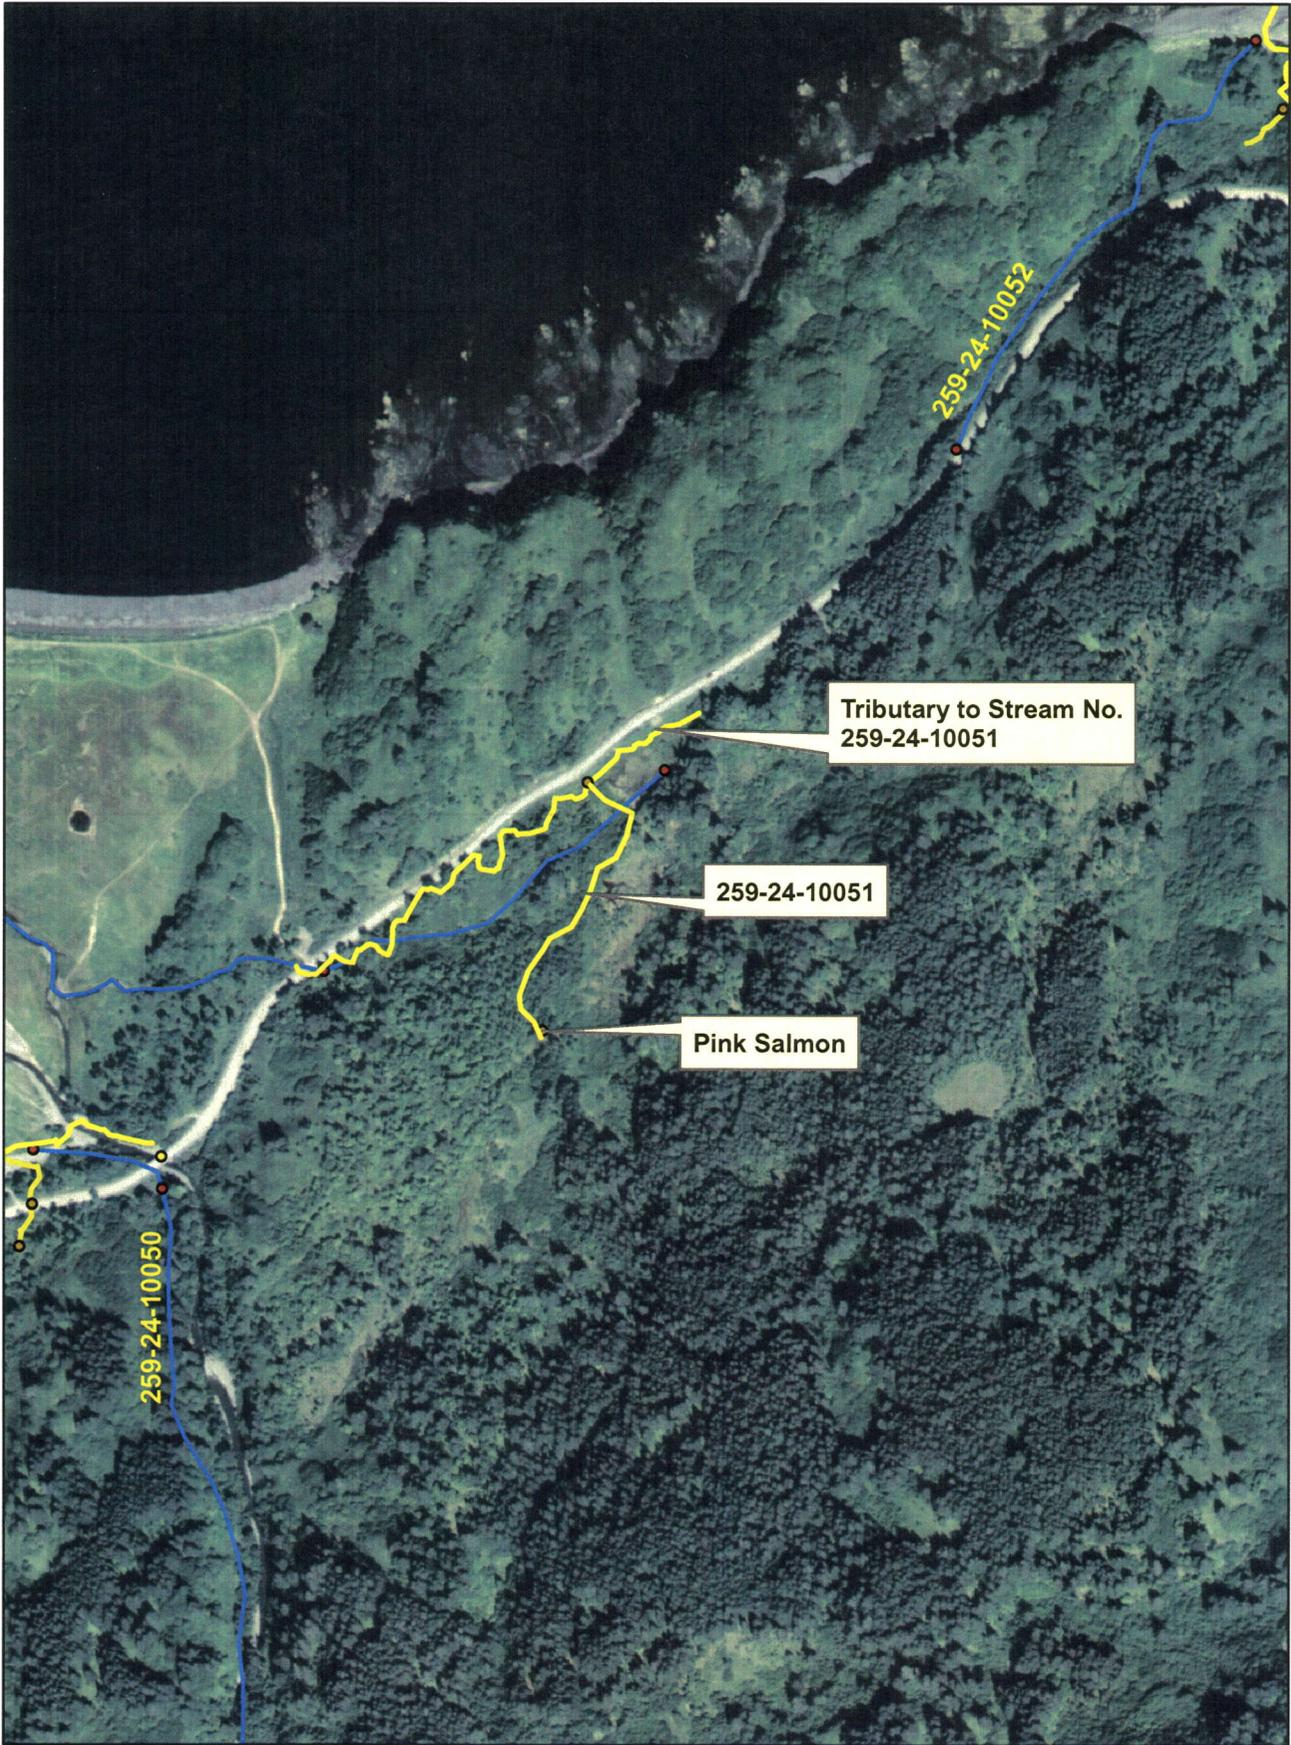

Figure 2

An aerial photograph of a river system, likely a tributary of a larger body of water on the left. The river is overlaid with several colored lines: a blue line, a red line, and a green line. There are several circular markers along the river: orange circles, purple circles with a cross, and a green circle. A white text box is positioned in the upper right quadrant of the image. The surrounding terrain is a mix of dark green forest and lighter green grassy areas.

add pink salmon spawning 259-24-10051
hydro for 259-24-10051 changed per 13-069
use arc2014 for hydro 259-24-10051
change number on upstream portion of 259-41-10051 to 259-41-10051-2013
