IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Remember portion of 259-29-10052 as 2006

During a foot survey I observed pink salmon spawning in the main creek. (Figures 1 and 2). The upper extent of the specified reach as currently depicted in the AWC is a tributary to Stream No. 259-24-10052. The main stream flows through culvert KOD05-CR08.
