IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:

During a fish habitat survey, I used a GPS to map the true location of Monashka Creek. I located a 30-foot high barrier at the upper extent of the specified reach (Figure 1). Please correct the location of Monashka Creek.

Update hydrography and add barrier to stream (259-10-10015)
