IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: update hydrography & reposition pts for 259-41-10005
 During a fish habitat survey, I used a GPS to map the true location of Stream No. 259-41-10005. I observed about 25 juvenile coho salmon in an unnamed tributary about 270 meters above the confluence with Stream No. 259-41-10005 (Figure 1, IDENT 169). Please correct the location of Stream No. 259-41-10005 and add the unnamed tributary
Add new stream 259-41-10005-2020 w/coho salmon rearing
