Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Juvenile Coho (10)	3/19/2013		X		<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:

Add new stream w/ coho salmon rearing, add border on upstream of upper part

During a fish habitat survey, I observed juvenile coho salmon in a tributary to Stream No. 259-21-10120-2006-3050 (Figure 1, IDENT 163). About 30 meters above the observed fish a 12-inch diameter CMP is blocking fish passage. The culvert is located in an abandoned military road. Please add the new tributary to the AWC.

Name of Observer (please print): Will Frost, Habitat Biologist
