OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Sockeye Salmon	9/2/2014	X			<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:**  
 While conducting an areal survey by helicopter, I observed about 100 sockeye salmon spawning (Figure 1, IDENT 271 and 372). I observed multiple redds in the stream gravel. The water clarity was excellent.  
*Add sockeye salmon spawning to stream*

Name of Observer (please print): Will Frost, Habitat Biologist
