OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Coho Salmon (10)	6/19/2014		X		<input checked="" type="checkbox"/>
Adult Pink Salmon	Fall 2013			X	<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

add new stream w/ coho salmon rearing & pink salmon present
 During a joint survey with the USCG, I used an electrofisher to sample an unnamed tributary that flows into a larger unnamed tributary to the Buskin River. I captured juvenile coho salmon (Figure 1, IDENT 143). USCG staff observed adult pink salmon in the tributary in the fall of 2013 (Figure 1, IDENT 143). I observed salmon bones along the streambanks. The tributary flows through the USCG Communications Station.
