IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:

During a fish habitat survey I used baited minnow traps to sample for fish in an unnamed tributary to Beaver Lake (Figure 1, IDENT 388 and 390). juvenile coho salmon were captured and Dolly Varden over 250 mm were observed moving up the stream channel.

*Add new stream 259-10-10035-2402 as coho salmon rearing) Dolly Varden present
 add Dolly Varden present to 259-10-10035*
