IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:

This nomination adds a tributary to Felton Creek. The tributary originates in a 100 foot long by 30 foot wide spring fed pool adjacent to Saltery Cove Road on the south side of the American River, Kodiak Island. Seven adult pink salmon and 60-100 juvenile coho salmon were observed in the spring pool.
