IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:
 During an ADF&G fish survey in support of the Anton Larson Bay Road extension, we used an electrofisher in an unnamed tributary of Chalet Creek to capture juvenile coho salmon (IDENT 208). We used a Garmin GPS to map the creek downstream from the proposed road crossing. About 10 adult pink salmon were observed spawning in the lower reach (IDENT 207).
