STREAM SURVEY LOG

Afognak A-2

DATE: Aug 24, 88

PILOT: None

AIRCRAFT: None/M/V Coho

TIDE: Hi 1:04 pm +6.0/Low 6:58

Stream No.	Stream Name	Stream Visability P	F	G	E	Species	Numbers 1/ of Fish by Location Bay	Mouth	Stream	* Map of streams on back side Remarks
252-331A	Danger Bay			✓		Pink	0	0	221	Walked stream to Lake finding most pinks in Lower section before it forks. Coho spread out with majority being below fork. All looked fresh and bright including one up by the Lake. Pinks all colored up and spawning.
						Chum	0	0	0	
						Coho	0	0	28	
331B	"			✓		Pink	0	25	373	Pinks evenly spread out with spawning occuring mostly upstream above old beaver damn (washed out). There a high percentage of bear killed fish along stream banks (i.e. name of creek) Fish all colored up and in stream for a while
						Chum	0	0	0	
							–	–	0	
331C	"			✓		Pink	0	0	514	All Pinks in Lower half of river below fork, colored up and spawning. There's a small log water fall below fork and fish not able to get above it. None observed above that point. None observed in saltwater near stream mouth
						Chum	0	0	0	
							–	–	0	
332	"	✓				Pink	*800-1000	* 600	* 1200	Due to size of river and depth due to high tide not able, to get an accurate count of fish. #'s are all in estimates - better counts could be obtained from arieal survey * Estimates
						Chum	?	* 60	* 200
