 Name addition:

USGS name Unknown
 Local name Steller Creek

Species	Date(s) Observed	Spawning	Rearing	Migration
Coho Salmon			X	

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

One young coho was caught in this stream. Steller Creek is the middle, and largest, of the three creeks that flow into McDonald Cove on the east side of Agattu Island.

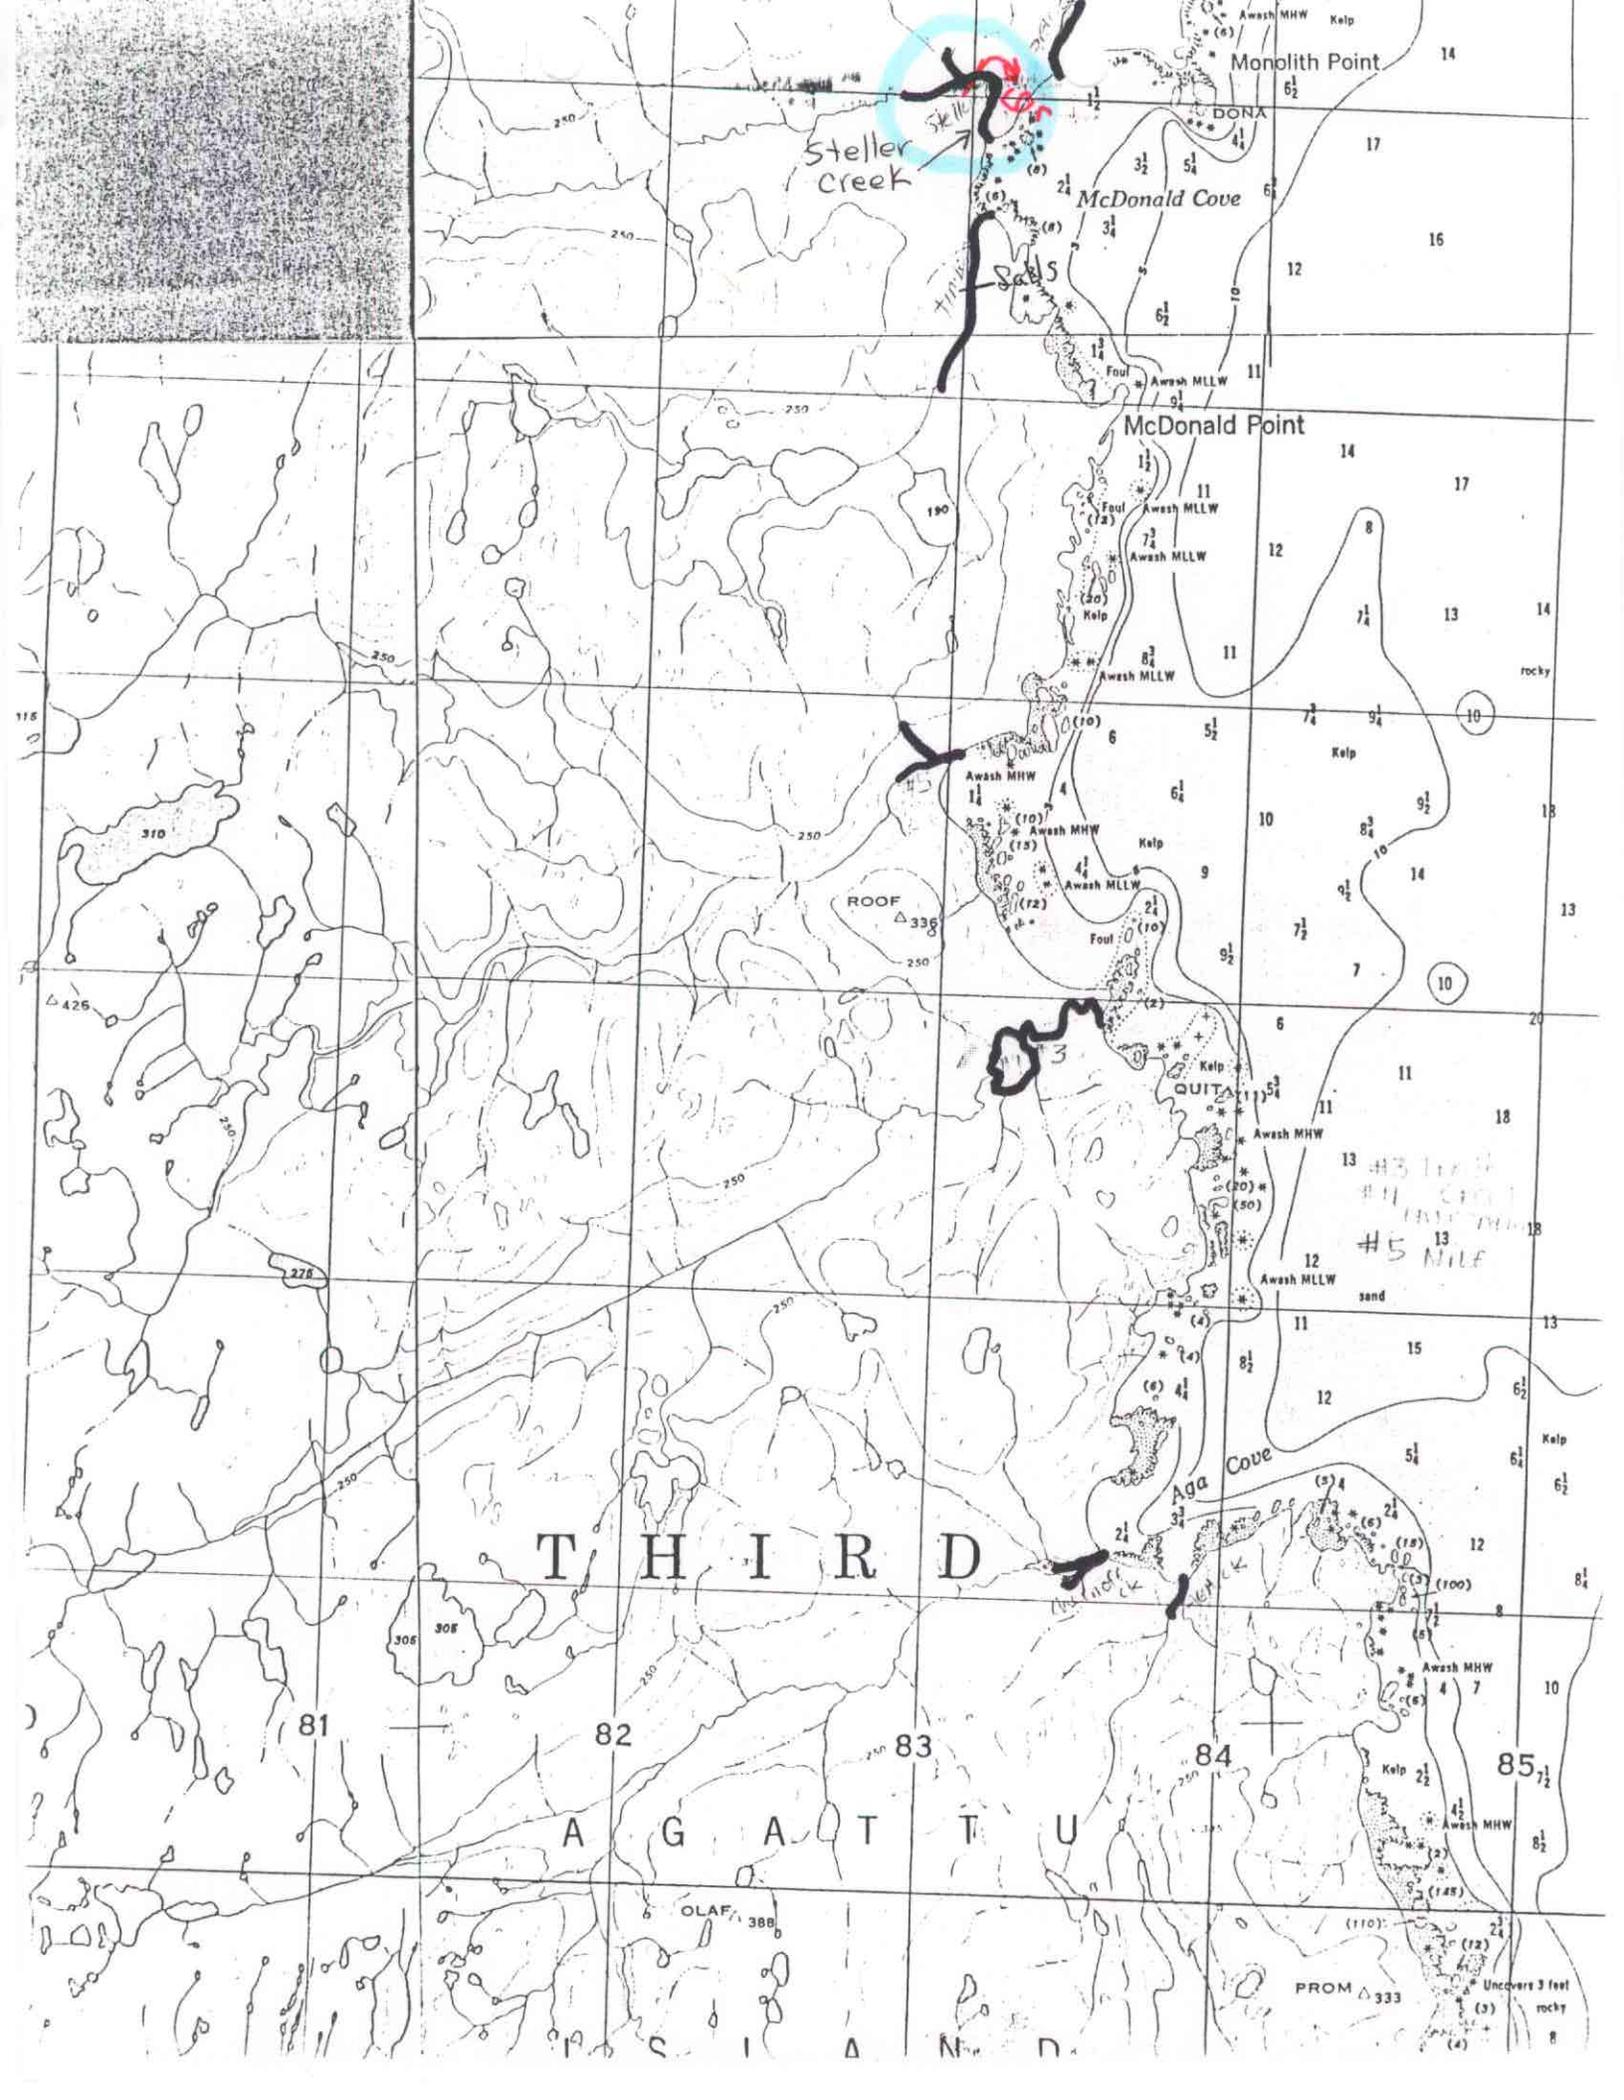

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
